-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

### ***Specification***

1. The disclosure is objected to because of the following informalities: In paragraph 2, sentence 1, change "employs cable" to --employs a cable-- and "users to" to --users a way to--. In paragraph 21, sentence 1, change "piece10" to --piece 10--. In paragraph 22, sentence 2, change "fig. 2c" to --Fig. 2c-- and "sandwiched" to –sandwiched--. In paragraph 24, sentence 1, change "circumferences top" to --circumferences of top--. In paragraph 24, sentence 2, change "figs. 3a" to --Figs. 3a-- and change "piece 40 is fitted" to --piece 40 fitted--. Appropriate correction is required.

### ***Claim Objections***

2. Claim 1 is objected to because of the following informalities: In part (f), change "eye hood" to --eye hook-- and change "between grab bar" to --between a grab bar--. In claim 5, change "sandwiched" to –sandwiched--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, because part (c) claims "a washer piece for insertion into said bolt body", however it is the bolt that is inserted into the washer. This needs to be accurately stated.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Hoffman (US 6,572,483). The patent to Hoffman discloses an eye hook 30 with a bolt body and a threaded end (see Figure 4). The bolt body is slidably inserted into the top cap piece 46 as well as the washer 52. A nut 54 is used to secure the washer to the threaded end of the bolt body. The top cap piece 46 is connected to the bottom piece 36 which contains a bar 44 (see Figure 3). With respect to “means for connecting said bottom piece to said top cap piece”, the bolt body acts as the means. Hoffman also discloses ball bearings 50 sandwiched between two round disks (see Figure 4).

***Allowable Subject Matter***

7. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Guinn, Smith, Miller, Nissen, and Scherba all disclose various mechanisms that prevent the transmission of torque from one part to another. Wiley discloses a method for receiving a bar and attaching it to a swivel joint.
